

# ISO/IEC 20000 Professional Certification

## MANAGEMENT AND IMPROVEMENT OF ITSM PROCESSES

### Course Objective

The 2.5-day ISO/IEC 20000 Professional Management and Improvement of ITSM Processes certification training course fully prepares every participant for EXIN's "ISO/IEC 20000 Professional Management and Improvement of ITSM Processes" certification examination.

This ISO/IEC 20000 Professional certification training course provides IT professionals working in an IT Service Management (ITSM) improvement environment with a clear ISO/IEC 20000 implementation roadmap.

Both internal and external IT service providers are challenged more than ever to provide high quality IT services and have adequate service management processes in place. The ISO/IEC 20000 certificate provides the required evidence that the IT service provider has an effective and reliable Service Quality Management system in place which has been audited against the international standard in ITSM.

### Prerequisites

- ISO/IEC 20000 Foundation Certificate

### Target Audience

- Professionals working for both internal or external IT Service Providers, IT departments, or IT organizations who play a role or have an interest in ISO/IEC 20000 certification even if such organization is not (yet) certified for ISO/IEC 20000

### Our Instructors

- All instructors of InterProm USA are ITIL Service Manager certified and are also ISO/IEC 20000 certified consultants.
- We use our own accredited course materials and our own accredited instructors who also possess hands-on ISO/IEC 20000 implementation experience

### Duration and Location

- The training course and the EXIN certification examination are conducted at our training facilities or onsite at your own facilities. Please visit our website for details.

### EXIN Certification Examination

- A 1.5-hour **written** multiple-choice exam that is being proctored through EXIN
- Examination is conducted concurrently with the training course

### Curriculum

#### Participant will learn:

#### Align IT Service Management to changes in the Business

- Adapt the Management System to support the business
- Identify and manage risks

#### Maintain the Management System

- Outline the importance of effective communication
- Outline the importance of people in IT Service Management
- Apply documentation requirements

#### Apply the Continual Service Improvement Lifecycle

- Apply process theory and the PDCA cycle
- Apply continual improvement

#### Analyze compliance and efficiency

- Analyze process efficiency and compliance to standards
- Analyze the implementation of management control on the supplier chain
