

ISO/IEC 27002 Foundation Certification

FUNDAMENTALS OF ISO/IEC 27002 INFORMATION SECURITY MANAGEMENT

Course Objective

The 1.5-day ISO/IEC 27002 Information Security Management Foundation certification training course fully prepares every participant for EXIN's "ISO/IEC 27002 Information Security Management Foundation" certification examination.

The ISO/IEC 27002 Foundation certification training course provides IT professionals working in an Information Security Management (ISM) improvement environment with a clear understanding of the basic principles of ISM.

The ISO/IEC 27002 certificate provides the required evidence that the IT service provider has an effective and reliable Information Service Management system in place which has been audited against the international standard in ISM. The ISO/IEC 27002 Foundation training course will accelerate the process of IT service providers who are seeking this quality level.

Prerequisites

- N/A

Target Audience

- Professionals working for both internal or external IT Service Providers, IT departments, or IT organizations who play a role or have an interest in ISO/IEC 27002 certification even if such organization is not (yet) certified for ISO/IEC 27002
