

ISO/IEC 27001 Maturity Assessment

USING ISO/IEC 27001 AS YOUR MEASURING STICK

Introduction

Whether or not you are seeking ISO/IEC 27001 certification, our **ISO/IEC 27001 Maturity Assessment** provides a measuring stick of your current state of Information Service Management (ISM) maturity.

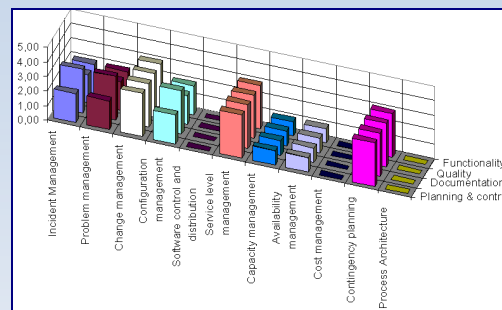

Increasingly Popular Assessment

Statistically, security issues are more often caused by people and process-related issues than technology omissions. The **ISO/IEC 27001 Maturity Assessment** was designed to focus on just those two major aspects causing most of the Security Officers' concerns, making it our assessment service that increasingly is gaining in popularity. Besides the non-technical-focus, there are two additional explanations:

1. **ISO/IEC 27001 Contributions**
 - a. The global ISM standard is prescriptive in nature; either you meet the minimal requirement, or you don't
 - b. The requirements and the code of practices of the standard are unbiased; no discussion whether the topics addressed are important or not
 - c. The standard is an objective measuring stick for your information security's maturity
2. **InterProm USA's Contributions**
 - a. Our questionnaires are clear and concise allowing for a rapid assessment
 - b. At the same time our decades-long ISM experience assures the quality of the outcomes of the assessment
 - c. The assessment results are easy to interpret and serve as a clear maturity indicator and point you in the right direction how to progress with your ISM program

The Assessment Process

Prior to the assessment we agree on scope, duration and expectations. We determine the stakeholders who will be part of the assessment and we also provide you with a list of documents that will support the assessment efforts. During several face-to-face or virtual meeting sessions an experienced InterProm USA consultant will lead the stakeholders through the assessment questionnaires. Combined with this effort the initial quick wins are being determined. Afterwards, you will receive a maturity scorecard, your 'measuring stick', and documented observations to your benefit in proceeding with your ISM adoption efforts.

Duration

A typical **ISO/IEC 27001 Maturity Assessment** lasts 3-5 days depending on the scope of the assessment and the size of your organization. By repeating the assessment every 6-12 months your improvements or areas for further improvement will become visible. The results become a motivator for your staff.

Level of ISO/IEC 27001 Familiarity

Your participating stakeholders do not need to possess any knowledge of the ISO/IEC 27001 standard. It is preferable that the participants have a fundamental level of familiarity with ISM nomenclature.

Interested?

Our ISO/IEC 27001 certified consultants would be glad to answer any additional questions you may have. We would also be pleased to provide you with a detailed quote for your budgetary planning purposes. Please feel free to contact us for more information.
